Your success is our priority.

Profold 500 QV Vacuum Feed Folder

A quiet folder with performance worth shouting about

Performance, reliability, flexibility and convenience: these are just a few of the qualities document-handling professionals should demand in their processing equipment. The Profold Super Elite 500 QV™ Vacuum Feed Folder, presented by BÖWE BELL + HOWELL, delivers these characteristics and more.

The Profold Super Elite 500 QV Feed Folder offers big machine performance at tabletop prices – plus a host of innovations that make it ideal for virtually any mail-processing scenario. Begin with its raw productivity: the unit can feed and fold up to 36,000 sheets per hour in tri-fold or half-fold formats, while an integrated electronic counter makes it easy to keep track of that remarkable output pace. Combining high speed with low volume, a built-in “quiet vacuum” reduces the folder’s overall noise level by 90 percent, which allows it to be placed in even the most customer-sensitive locations.

Next are the rollers, constructed from a proprietary urethane substrate that can handle a wide variety of media. This urethane also increases the mechanisms’ longevity without costly breakdowns or maintenance-related downtime. The design of the specially grooved primary roller forces laser toner and ink to the sides, reducing clean-up time and minimizing accidental markings that can sometimes be made on pieces as they are fed through the machine. The unique roller groove even serves as a channel for trapped air caught between paper and roller to escape, which results in a tighter fold.

To make it as adaptable as it is powerful, the Profold Super Elite 500 QV Feed Folder has skewable paper side guides that compensate for variances in paper stack “squareness”: this on-the-fly variability helps maintain a square fold, without the delays or inaccuracies of hand-adjusting the fold plate paper stop.

Powerful and innovative, the Profold Super Elite 500 QV Feed Folder meets the exacting standards that have made BÖWE BELL + HOWELL an undisputed leader in high-performance document-processing solutions. Add this essential workplace tool to your operations today.

Profold 500 QV Vacuum Feed Folder

Benefits

- Top speed of up to 36,000 sheets/hour fosters high productivity
- Innovative roller design enhances product life and reduces maintenance-related downtime
- Skewable paper-side guides help to maintain fold accuracy
- Quiet Vacuum pump minimizes operational noise

BBH Financial Services (BBHFS) provides a variety of competitive and flexible financing options for BÖWE BELL + HOWELL customers

Specifications

Paper size / weight:

- 5" x 5" (Min); 4" x 20" (Max)
- 14lbs. (Min); 67lbs. (Max)

Max speed: 36,000 sheets per hour

Power source: Flexible; available per customer specifications

Dimensions:

- Height - 19"
- Width - 25"
- Length - 23"
- Weight - 200 lbs (unit - boxed); 50 lbs (stand - boxed)

Stand: Sold separately. Discounts available when ordered with unit

Options: High-speed off-load conveyor and built-in bump turn available

Leasing options

BBH Financial Services (BBHFS) provides a variety of competitive and flexible financing options for BÖWE BELL + HOWELL customers.

Award-winning service

BÖWE BELL + HOWELL offers preventative maintenance agreement (PMA) services at a variety of levels to suit customer needs, including traditional on-site resident service programs, on-call service or specially tailored agreements for customers who maintain their own equipment to BÖWE BELL + HOWELL standards.

Field Services is backed by a staff of professionals uniquely qualified to provide service to mailroom and office equipment throughout North America, and a state-of-the-art Customer Care Center that supports all service calls and parts orders 24 hours a day, seven days a week. Service staff is also available to provide installation support and customer training.
